

Figures (placeholders)

Figure 1 (placeholder). Schematic of the layered black hole model. Concentric semi-transparent rings represent energetic layers; arrows indicate wave exchange and partial reflection.

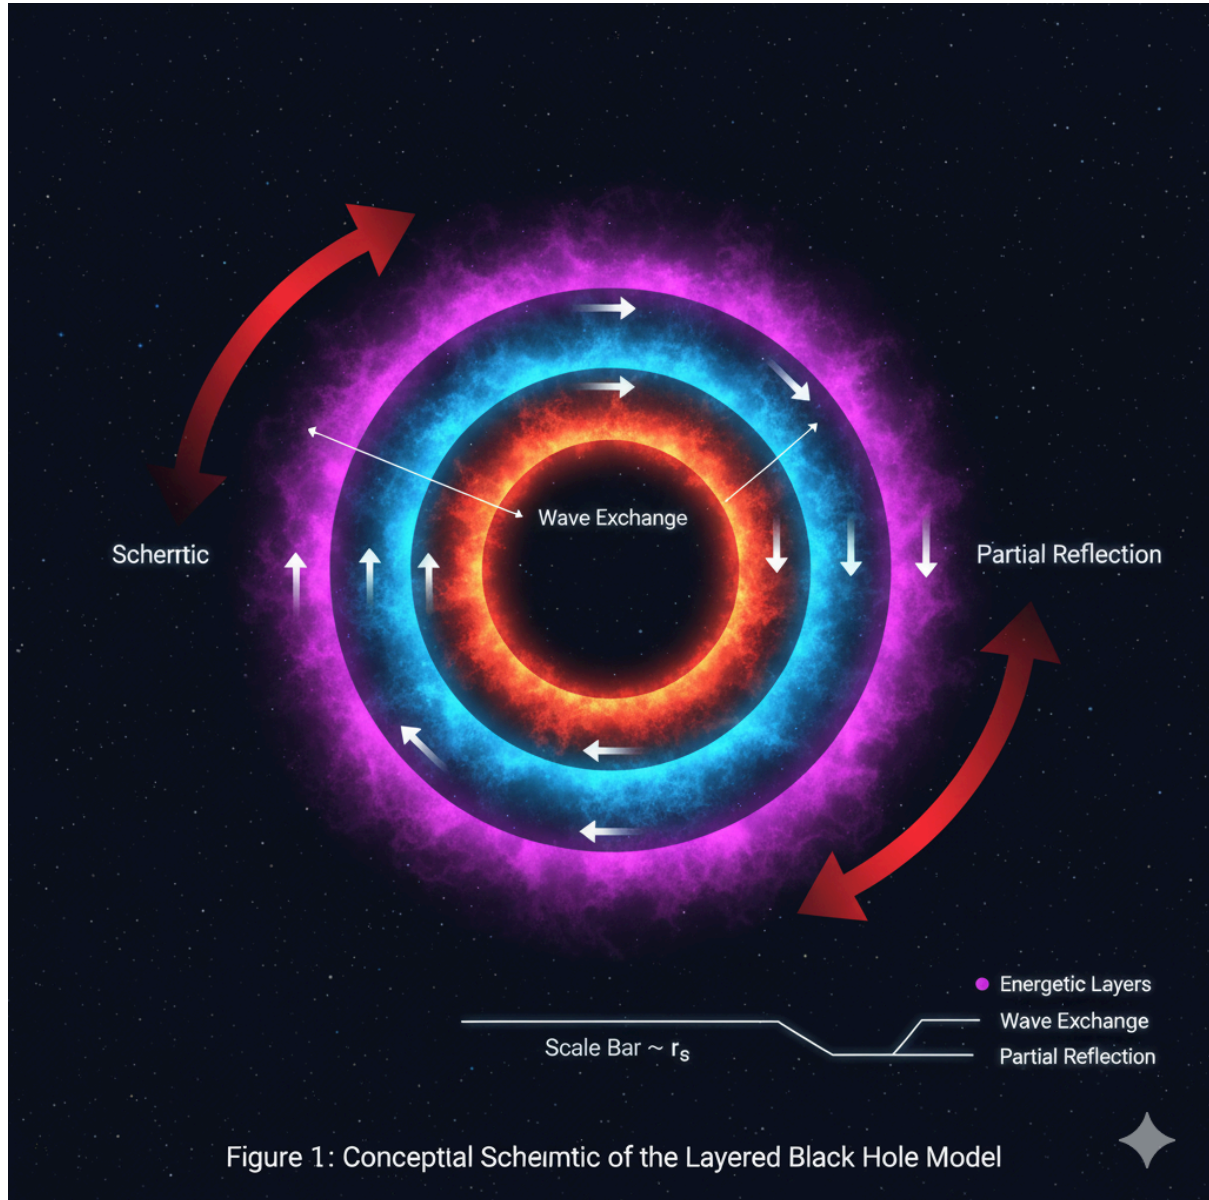

Figure 2 (placeholder). Optical veil photon propagation sketch. Example photon geodesics showing phase shift and attenuation across layers; inset: predicted distortion of photon ring.

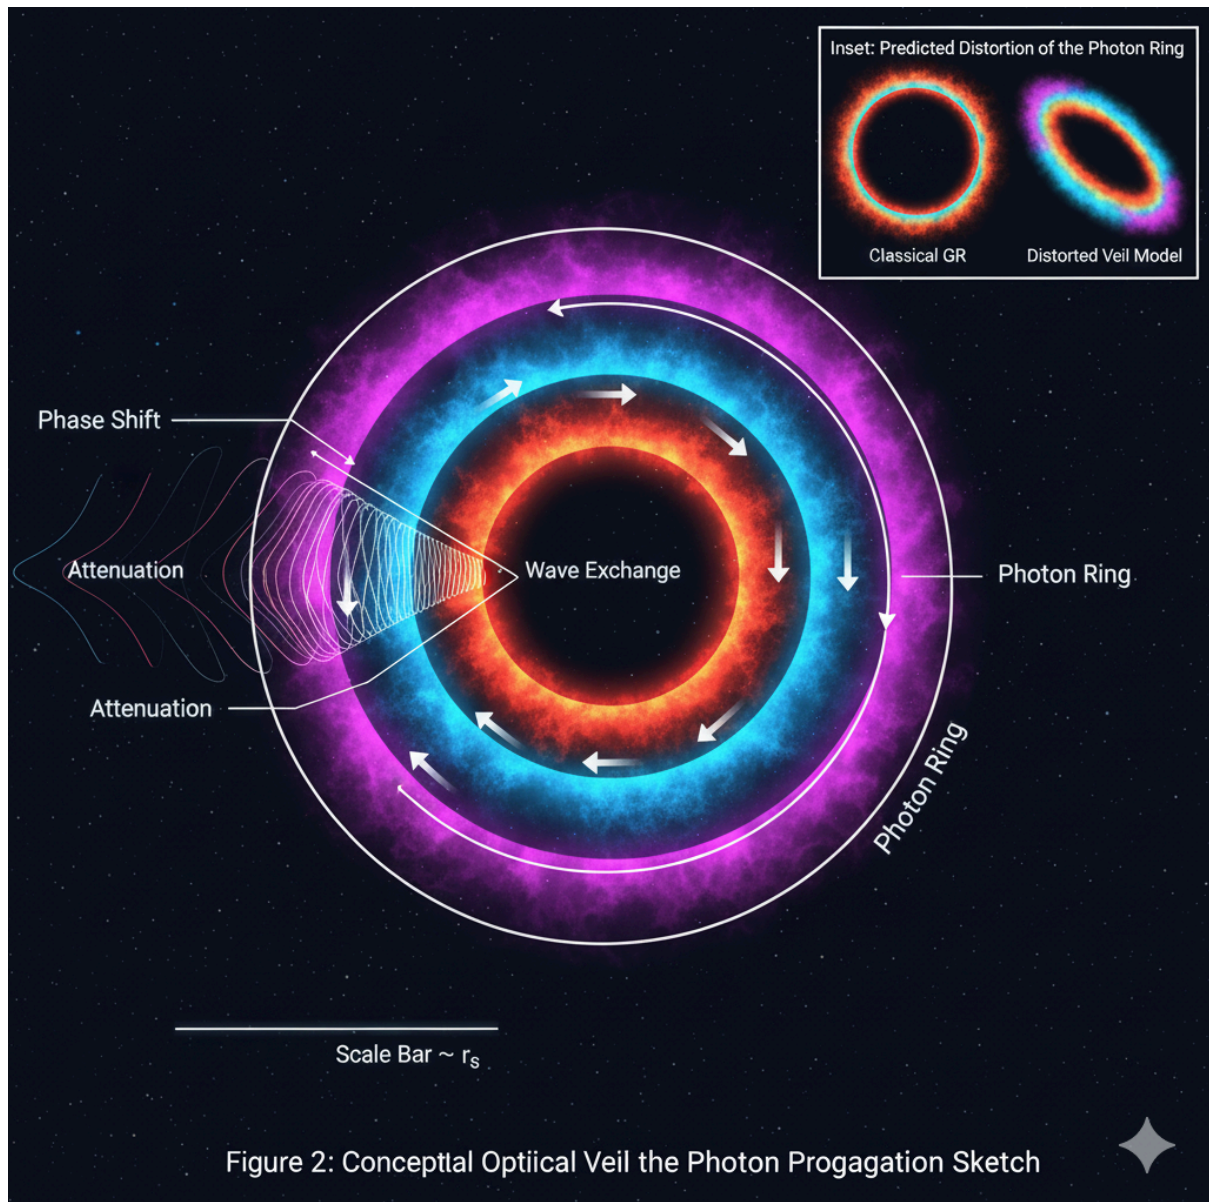

Figure 3 (placeholder). Echo phenomenology. Simulated idealized waveform: main ringdown followed by weaker delayed echoes; caption should indicate parameter choices.
